

## PROPOSED POLITICAL RESOLUTIONS FOR STOP THE DRAFT WEEK

1. End U.S. imperialist foreign policy--We demand the immediate withdrawal of U.S. troops from Vietnam and the rest of SE Asia and Latin America, an end to the support of reactionary governments around the world, and an end to the military, political, and economic exploitation of peoples throughout the world by the U.S. political and corporate power structure.

2. No Draft for this government's wars-- We demand the abolition of the draft and the selective service system which are tools by which the government carries out its oppression of people at home and abroad. We support individual draft resistance, and encourage agitation and resistance within the military for those who chose to serve.

3. Our first problem is at home--This government's foreign wars serve as a blind for its continued oppression of people in this country. Our war is here, against racism, poverty, social and cultural exploitation, and against the institutions which perpetuate them.

4. End police brutality and the military domination of the ghettos We do not see the police as the enemy, but as the repressive tools of the power structure at home. If the police choose not to be humanized, we must resist and defend ourselves in our continuing fight against this oppressive system. We solidify ourselves with the black liberation struggles which seek to end the economic, political, and military domination of their communities.

5. Conscience and right above law and order--"Law and order" in this society are equivalent to oppression and stagnation. We break laws not as anarchists, but because we have a different standard of "right" than the one by which this country is ruled. We must break certain laws both because of conscience and because it is politically necessary in order to bring about basic change in this society.

6. Release all political prisoners--We demand that those arrested for their political resistance to the American power structure including Huey Newton, the Oakland 7, Dr. Spock, LeRoi Jones, etc. be set free.

7. Oppose the 2-party system-- We reject the Democratic and Republican parties which perpetuate the war machine and the oppression of people in this country. We support radical independent political action which counterposes itself to the existing power structure.
