The men who run this university insist on telling us how to live our lives. They also insist on telling the people of Vietnam not to live at all. The men who determine your pay help rain death and destruction on our fell human beings.

We are sitting in because we demand that the resources of this university be used to help mankind not destroy it.

Our education is aimed at forcing us to the work the university bosses want us to do. This, we think, makes our situation similar to that of many university employees.

We want a university where workers can study and students can work. Don't you?
