WE, THE UNDERSIGNED MEMBERS OF BURBANK HOUSE, DO HEREBY PUBLICLY AFFIRM THAT WE:

1) Deplore all forms of research in chemical and biological warfare, counterinsurgency, and other warfare tactics and practices now being carried out at Stanford and SRI, especially as this research relates to present U.S. involvement in S.E. Asia. Further, we call for an immediate end to all such research on the Stanford campus and at its affiliated research centers.

2) Believe that all forms of classified research should be banned from the University, unless it can be convincingly shown that such research is directed solely toward the causes of peace and the betterment of life in our world.

3) Support the non-violent sitin now in its seventh day at AEL, the understood purpose of which is to help bring about immediate and constructive changes at Stanford with regard to the above-named concerns.
