

DECLASSIFIED

BY THE AUTHORITY OF THE PEOPLE
Volume I, Number 9

April 18, 1969, BEHOLD: A Friday
Published in the Applied Electronics Laboratories
Stanford, California

WE'RE GONNA GET THERE

The Applied Electronics Laboratory was the birthplace of a movement and its community. We came here knowing little about our greatest strength: our ability to live and work together in peace and love.

We have had our hassles; we have had our joys; we have made mistakes; we have been brilliant. We will continue to have all these things. But we have hung together. We know that our task is enormous; we know that the present struggle is just one of the battles we face as we create a new world. We know that togetherness is our greatest strength.

We may leave the AEL today. President Pitzer has made this less difficult for us by stopping all research in the building. But our com-

munity will stay together.

We have been offered the Old Union Courtyard and the Women's Club lounge to use as a center for our organization. We have been offered mimeograph facilities and telephone lines from the Campus Christian Ministry upstairs. We may accept these kind offers.

The most intensive educational campaign in Stanford history will continue. We will continue to coordinate our efforts in learning and teaching about what kind of place our University must become.

And we will spread our message throughout the students, the faculty, and the community.

Our society must no longer be run on hatred and fear. We will control our destiny.

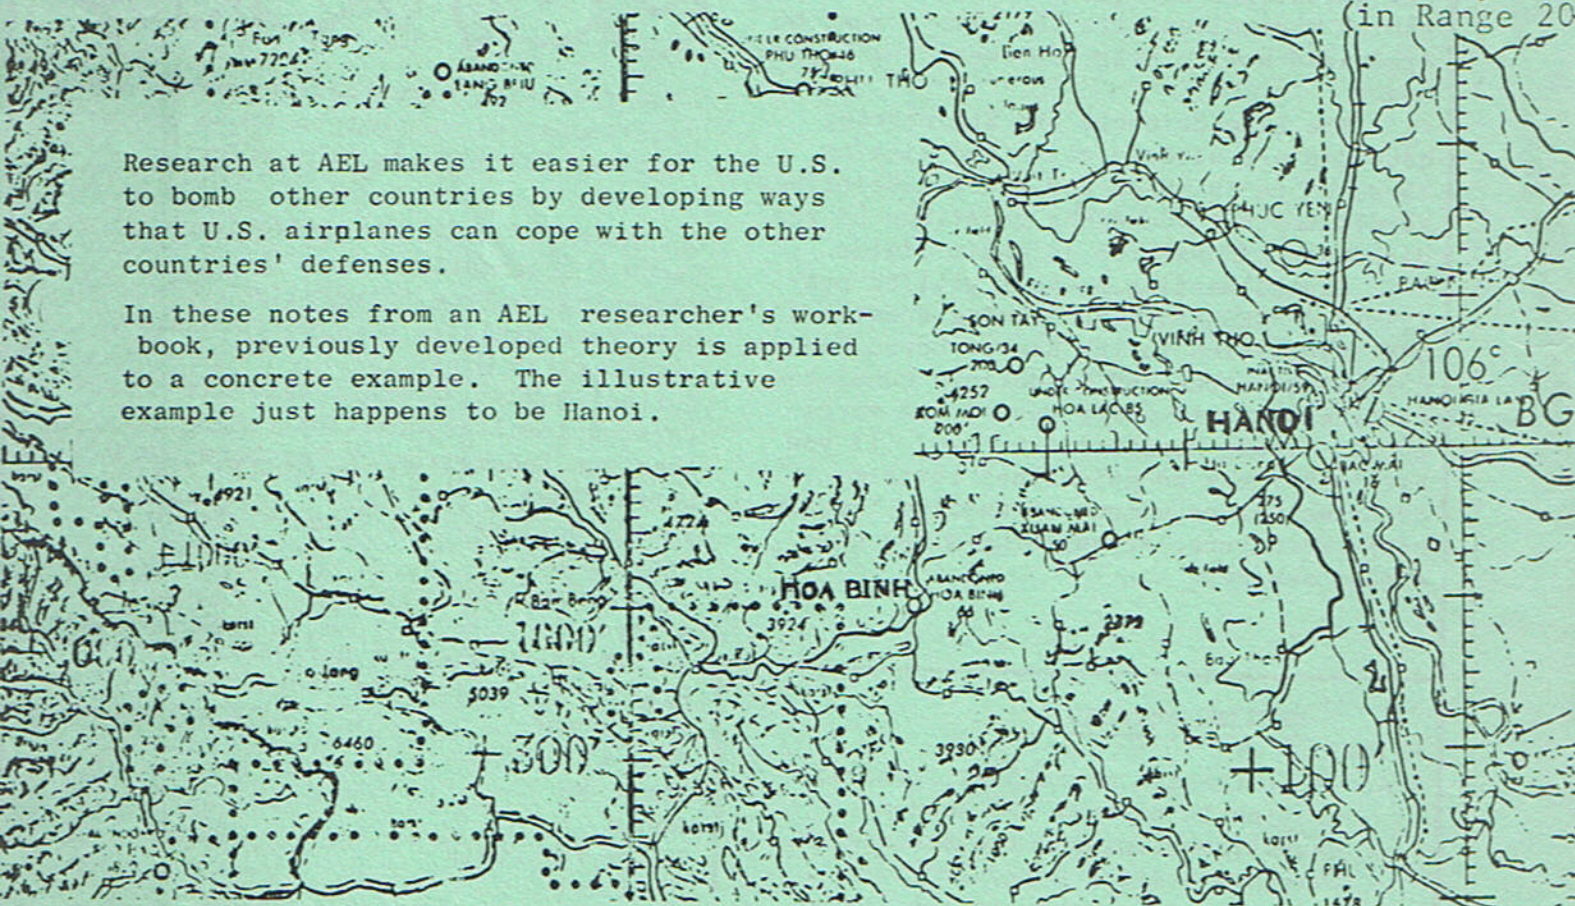

TABULATION OF REFLECTIONS OF OPPORTUNITY

(CENTERED ON AIRPORT EAST OF HANOI)

Approach	Heading from HANOI	A/C Heading	Reflection # (Alt.)	Range Reflection to Target	Dist. of Beam A/C	Remarks
A	180°	360°	a) 1578	31.5	2.4 L	Clear to Tar
B	200°	20°	a) 1893	44	2.5 R	Partially blo
			b) ≥1K	32	1.8 L	Clear to Tar
C	220°	40°	a) 3133	60	7.5 R	Partially blo (in Range 20

Research at AEL makes it easier for the U.S. to bomb other countries by developing ways that U.S. airplanes can cope with the other countries' defenses.

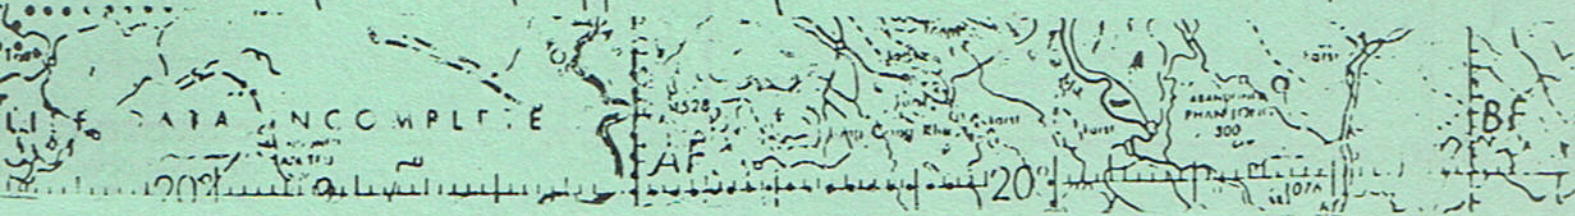

In these notes from an AEL researcher's work-book, previously developed theory is applied to a concrete example. The illustrative example just happens to be Hanoi.

ILLUSTRATIVE EXAMPLE

Aircraft heading 130° - approaching Hanoi and coming on a radar site on airport east of Hanoi

Reflection of opportunity - Hill 3061 north-west of Hanoi

RESEARCH GUIDELINES

COMMITTEE

The review Board and Guidelines Committee has presented a tentative set of research guidelines for acceptable research at Stanford and SRI, and a Review Board system for implementing these guidelines.

The Community has approved the guidelines. Now departmental caucuses must be organized so that the Review Board can function. Our friends who subscribe to our guidelines and goals but have not connected themselves with the sit-in must be organized now to help implement the Review Board.

The Life Sciences and Engineering caucuses are already alive and kicking. Those of us in these and other disciplines should begin to consider questions of re-direction of research in their fields.

Caucus meeting notices will be published in DECLASSIFIED. Bring questions and information to the Review Board Council and Research and Guidelines Committee meeting at 11 AM every day at the microphone. These meetings are open. If you have any ideas on guidelines revision, departmental or campus organizing, review board structure, or anything else, come around and rap.

MEETING NOTICES

FRIDAY:

9 Am -- at the AEL microphone: general meeting to discuss the Academic Council meeting and the Associated Students meeting scheduled for today and to respond to the statement of the Student Judicial Council.

11 Am - Academic Council Meeting

1 Pm -- General meeting of the Associated Students of Stanford University at Frost Amphitheater to discuss research, SRI, and the sit-in.

MONDAY:

4:15 Pm -- in Tresidder Rm. 274-275: Social Sciences Caucus. Discussion of Radical Social Science with Steve Weissman and friends.

SUPPORT!

The following organizations have issued statements of support to those occupying Applied Electronics Laboratory:

Occupiers of UCLA administration building
 March 4 Convocation
 Midpeninsula Free University
 Corporate Ministry of Mid-Peninsula
 Christian Ministry
 United Student Movement-Palo Alto High
 International Association
 American Federation of Teachers Local 1816
 Serra House
 Twain(Holloday and Fremont) House
 Cedro House
 Soto House
 Arroyo
 Sotere el-Turrian of Surrealist Movement
 History Grad Students Assoc.
 Muir House
 Beta Chi
 Lamda Nu
 Roble
 Delta Tau Delta
 Cardenal
 Berkeley Radical Student Union
 University of Pennsylvania
 68 at SLAC
 31 from Stanford in Austria
 Concerned Asian Students
 Alpha Sigma Phi
 Grove
 Theta Delta Chi
 Junipero
 Harvard SDS
 Sociology Grad Students Assoc.
