

PRINTING ROOM SABOTAGE

Sunday, April 13, 1:50 am

Word has come up from the print shop that the press has been sabotaged. The printer described the probable offender as around 5' 10" in height, light brown hair, light moustache, wearing orange or gold turtleneck, well tanned, slightly receding hairline, somewhat athletic. The printer left his press to run another job, and was gone for 20 minutes or a half hour.

When he returned to warm up the press for another run (it had been working well before), the suspect was leaning up against it. The printer left again for a few minutes, returned, and after a few minutes turned on the paper feed. ~~XXXX~~ The suspect had left. The printer noticed a strange hissing sound, and the paper feed mechanism failed to function.

One vacuum and one pressure hose, from inside the press, were discovered missing. The suspect was the only one known to be in the room during the periods when the printer was absent, and upon search, had vanished from the vicinity of the AEL building.

Nothing further appeared to be wrong with the press, and the missing hoses are inexpensive and will hopefully be replaced ~~XXXXXX~~ shortly.
